

## CIS 500 – Fundamentals of Software Practice

### Weekly Exercise #6

#### Topic: Files and Exceptions

#### Assignment:

- Read the instructions in the comment section at the beginning of the file **WEX-6.py** carefully.
- Complete only the “TO DO” section indicated at line 67 in file WCE-6.py
- You are supplied with input files to use when testing your program:
  - `input1.txt`
  - `input2.txt`
- You are also supplied with two files that show the expected output from your program:
  - `expected-output1.txt`
  - `expected-output2.txt`
- To run the program on input files given, use the following commands:
  - `python WEX-6.py input1.txt output1.txt`
  - `python WEX-6.py input2.txt output2.txt`

#### Exercise Instructions:

- Download the file **WEX-6.py** from Blackboard.
- Make required changes to code in file **WEX-6.py**.
- Run and test your code to make sure it works correctly.
- Upload the file **WEX-6.py** on Blackboard by midnight of due date.
